The references of record do not teach, show or suggest the features recited in the pending claims. Specifically, none of the references teach, show or suggest passing the concentrated slurry from the flash vessel to a transfer vessel, measuring a level of polymer particles within the flash vessel, withdrawing an amount of polymer particles from the transfer vessel and passing the amount of polymer particles from the transfer vessel to a purge vessel, the amount adapted to maintain the level at a predetermined level, separating remaining diluent from the polymer particles within the purge vessel and recovering the polymer particles from the purge vessel. Accordingly, Applicants respectfully request withdrawal of the rejections.

In conclusion, Applicants submit that the references cited in the Office Action, neither alone nor in combination, teach, show, or suggest the claimed features. Having addressed all issues set out in the Office Action, Applicants respectfully submit that the claims are in condition for allowance and respectfully request the same.

Respectfully submitted,
